You are advised to read it so you can make an informed decision about whether to invest.

M&M FLEXIBLE - CLASS: EUR – ISIN: LU1501479999

a share class of M&M FLEXIBLE (the **Sub-Fund**), a Sub-Fund of Tailored Fund SICAV (the **Fund**).
The Fund is managed by Crédit Andorrà Asset Management Luxembourg (the **Management Company**).

OBJECTIVES AND INVESTMENT POLICY

Objectives

The Sub-Fund aims to provide Absolute Returns through capital growth over the long term, through a flexible and diversified portfolio.

Investment policy

The Sub-Fund will invest its net assets mainly, directly or indirectly, into: (i) Equity Securities, mainly issued by middle (i.e. between about USD 2Bn-10Bn capital) and large (i.e. more than USD 10Bn capital) market capitalization companies; (ii) Debt Securities, including low quality Debt Securities with maximum 10% limit rated below BB or the equivalent by credit agencies); and (iii) Money Market Instruments.

The portfolio allocation per asset class is determined based on the market conditions, returns and volatility (i.e. dispersion of the returns) of the asset class and the correlation between the different asset classes (i.e. how one asset class influences the price of the others).

These investments will be principally made on OECD markets and residually in Emerging Markets.

The Sub-Fund may additionally seek exposure (i) to currencies and (ii) indirectly up to 30% to commodities, to provide higher gains and diversify the portfolio.

The Sub-Fund will mainly invest in assets in EUR, USD, JPY and CHF and up to 5% in assets in other currencies.

The Sub-Fund will use Derivatives for both Hedging and investment purposes.

Recommendation : an investment in the Sub-Fund is intended to be a medium to long term investment.

Specific Information on the shares

You can request the sale of your shares on a weekly basis, except in certain circumstances (see prospectus).

No dividends are intended to be distributed. Any income derived from the portfolio is reinvested.

RISK AND REWARD PROFILE

Meaning of the risk and reward indicator

The risk indicator aims to provide you a measure of the price movement of the shares. This category 4 means that the share price has an average price movement and therefore the risk of loss as well as the expected reward can be medium. The lowest category does not mean a "risk free" investment.

Historical data may not be a reliable indication for the future. The risk indicator shown is not guaranteed and may change over time. There is no capital guarantee or protection on the value of the Sub-Fund.

Reason why the Sub-Fund is classified in this risk category

The Sub-Fund is in category 4 because it invests in a diversified portfolio without investment restrictions save for very low quality Debt Securities and Emerging Markets. The portfolio may thus be subject to average price movements due to general stock and bond market volatility.

The following risks may not be fully captured by the risk indicator and may be materially relevant for this Sub-Fund:

Counterparty risk: the risk arising from the inability of any party contracting with the Fund to satisfy its obligations, in particular in respect of off-exchange financial transactions where the market does not guarantee the performance of contracts in case of defaulting counterparties.

Credit risk: the risk arising from the inability of an issuer of Debt Securities to pay interests or repay the sum borrowed under the Debt Securities.

Currency risk: the risk of loss arising from a change in the price of one currency against another, which may adversely affect the share value in case of discrepancy between the currency of the investments and of the Sub-Fund or share class.

Derivatives risk: the risk arising from investment in Derivatives where a small change in the value of the underlying may have a larger impact on the value of such Derivatives.

Hedged Strategies risk: the risk arising from improper hedging (e.g. when hedging insufficiently reduces the loss of capital or significantly reduces the potential rate of return of the investment hedged).

Liquidity risk: the risk arising when an insufficiency of buyers on the market affects the ability to sell investments.

Further investment risks are set out in the risk section of the prospectus.
